Set Up MGIC in Finastra's Originate Mortgagebot[®]- for Administrators

This feature allows MGIC rate card rates to automatically be pulled in your consumer facing Point-of-Sale system and allows lenders the ability to pull live MGIC risk-based pricing from Advisor and Lending Portal.

Last Revised Date: 04/03/2023

1. Select Partner

From the **Partner** panel, select the POS site in which the feature is to be enabled from the Partner drop-down list.

Click Continue.

Note: You will see any sites that you have access to on the **Partner** drop down-list. If you have more than one site, then you would see a list of sites. If you only have one, then that would be the only one on the drop-down list.

2. Enable MGIC as MI Provider

On the settings page, scroll down to the bottom of the page and set the following **Mortgage Insurance Information** values: a. **Active** to **Y**

- b. Internal Master Policy to your MGIC MPN
- c. MI Provider to MGIC

Click Update.
